Rooms & Cabinets

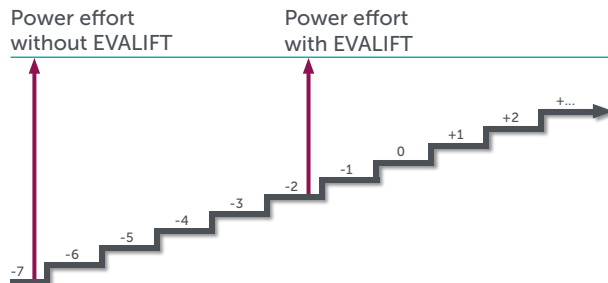

CO₂

Efficiency

Details

- Retrofit solution for systems with TECO₂ conditioner
- Boost efficiency in the cooling cycle
- Ideal for medium temperature cooling in MT/LT booster systems
- Easy installation – no special expertise required
- Fast return on investment
- Additional benefits:
 - Improved system stability
 - Enhanced operational safety
 - Extended system lifespan

Technology

Features

- Semi-flooded evaporators for higher saturated suction temperatures
- Suitable for all climate zones: subcritical/transcritical, winter/summer, and day/night operations
- No special requirements for the oil system
- Enhanced efficiency with integrated ejector
- Improved safety with a reliable separator

Components

- Ejector
- Liquid separator (172 L)
- Optimized performance with our intelligent control system
