ROXSTAHP extension

ROXSTAHP extension

Application

ROXSTAcube mini

ROXSTA cube /
ROXSTA cube pro

ROXSTAsmart

CO₂

Performance

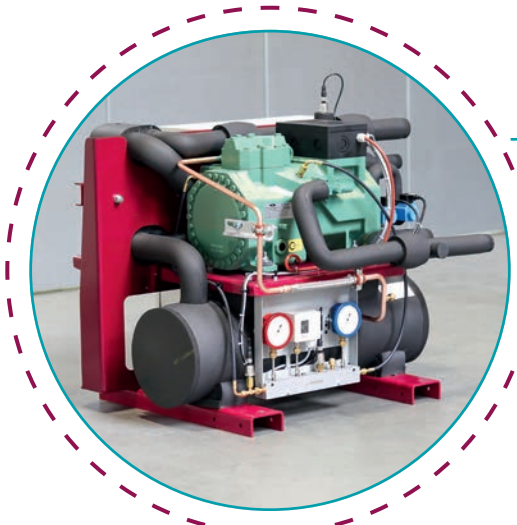

Heat Recovery

13...19

kW

Details

- Heat recovery retrofit solution
- Simple, well-known technology
- Independent circuit (Refrigerant & Oil)
- Flexible use
- Constant winter capacity utilization
- Constant heating power down to -15 °C ambient
- Load on MT compressors significantly reduced
- Constant supply of HW in the existing plant
- Low influence on the existing cooling system (additional cooling point)
- Constant conditions at the heat pump evaporator
- Standstill pressure up to ~30 °C
- Can be used for existing F-gas systems

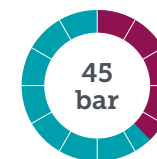

Technology

Components

- Unit with subcritical LT compressor, convection receiver, assembled controls
- Heat pump evaporator (WWP)
- Modular design
